Attn: The FCCS course provides a comprehensive learning experience by combining expert-developed lectures with hands-on skill stations as developed by the Society of Critical Care Medicine (SCCM). The traditional licensed course consists of in-person lectures and skills stations. The course is composed of didactic lectures, case-based skills stations, pre and post-tests, companion textbook and certification of successful course completion. To receive the certificate of successful completion, course participants must attend all didactic lectures, successfully complete all skill stations, and achieve a score of 70% or higher on the course post-test.
